Holistic security strategies to address non-consensual intimate images (NCII)

11:00 GMT Breakout Session

Lead discussants

Peace Olive Amuge, Program Manager, Information Sharing and Networking,
WOUGNET (Women of Uganda Network)

Sandra Aceng, Program Officer, Gender and ICT Policy Advocacy, WOUGNET

Patricia Nyasuna, Program Officer, Gender and ICT Program, WOUGNET

Session Facilitator

Rohini Lakshané, Director (Emerging Research), The Bachchao Project

Section 1

NCII: Context and background

Non-consensual intimate images (NCII) are defined as the distribution of sexually explicit images or videos that were initially shared with the expectation that they would remain private.

“Revenge porn” is a misnomer.

Section **2**

Holistic security strategies and measures

Changes in the law, policy, and social norms are necessary, but they will take time to come into effect.

Additionally, new threats such as **stalkerware** and **spouseware** have been emerging.

The only immediate recourse currently available for most sub-Saharan girls, women, queer and non-binary persons is to practice good digital security in order to recognize and prevent potential incidents of NCII.

Why it is important to talk about NCII?

What are the implications of NCII on the victims?

What are the legal frameworks regarding NCII?

Holistic security is an attempt to integrate these concepts [digital, physical and legal security, psychosocial wellbeing, and organisational security] and highlight their inter-relatedness so that we can approach these processes in a more connected and meaningful way.
